

SPECIFICATION SHEET

BELL CAP WITH CLAMP

The SBC Stainless Steel Bell Cap is designed to be used in conjunction with SBC Pipe Flashings when additional clearance and/or ventilation is desired or required. (Caulk Edge and Turn Down OPTIONAL)

Bell Cap with Clamp

Intended Use:

- Use when more clearance is necessary between pipe penetration & stack flashing.
- Use when venting is sought between pipe penetration and stack flashing.
- Use in lieu of sealant cover.

Materials:

1. 26 Ga. stainless steel type 304 2B finish ASTM A240
2. 50% lead / 50% tin ASTM B32 or specify non lead solder ASTM 96.5TS
